# HPK®

## Disposable Apparel for Every Industry

### **Mission Statement**

Our mission is to create and manufacture a wide variety of technologically advanced disposable garments and accessories. Our products are designed to meet the needs of patients, and also protect workers both in a variety of markets.

Among leading companies designing and manufacturing protective garments for healthcare, pharmaceutical, scientific, clean room, and industrial safety. HPK Industries' products have established and maintained their reputation for overall quality. Indeed, our products have long been recognized for quality - that essential, expected and deserved constituent of high quality made in USA products.

### **Quality is number one**

Quality is the first factor considered by our designers in the product development process, the first tested by our staff, and the first attribute sought by the users of our products. HPK quality is the primary reason why our customers demand HPK products. Made in the USA since 1985.

### **Multiple product lines to meet your needs**

HPK manufactures a broad array of disposables. The lineup includes disposable garments and accessories, clean room garments and medical non-woven products.

### **Manufacturing is our strength**

We are one of the last remaining companies manufacturing disposable garments and accessories for a diverse customer base solely in the United States. HPK's operations are housed in a 20,000 sq. ft. facility located in Utica, NY. We carry a wide range of raw materials that can be quickly converted into finished goods enabling us to deliver exceptional turn-around time.

### **No excuses from us**

HPK has perfected a build to order manufacturing process, each order is manufactured as it arrives. Your delivery time will vary by the size of your order. HPK's products are never "on the water" or "clearing customs". If you need a custom or job specific special item we can and will manufacture it quickly, efficiently and cost effectively. It will not take 8 weeks to deliver and there is never a minimum order. We can expedite production of your product and can overnight ship. We never charge our customers extra for these services.

### **We want to earn your business**

Serving customer needs is HPK's number one priority! We know customers expect more from us and we earn their business every day. Give us an opportunity to show you the difference from buying from a USA manufacturing company that actually manufactures in the USA.

## Sterilization Wrap

### Sterilization Wrap

- Made with SMS fabric
- HPK wraps offer high-level protection against fluids and particles.
- Strong and resistant to tears, the fabric is still soft so it's easy to drape.
- Naturally low linting, it helps maintain the integrity of the sterile packs and the surface is friendly to sterilization tape.
- Use the heavyweight wraps for heavy instrument sets and multiple basin sets.
- One-ply

Disposable Apparel for Every Industry

**Recommended Sizing Chart for Limited-Use Disposable Garments**

# HPK<sup>®</sup>

## Disposable Apparel for Every Industry

### Technical Testing Data for SMS Material

Test Item	Result	Test Standard	Test Description
Particle Shredding	Level II	IEST-RP-CC003.3	Garments are tumbled in a stainless steel drum for 10 minutes. Particles are counted with a laser particle counter.
Weight (g/m2)	33.3	ASTM D3776	Measurement of fabric mass per unit area (wt).
Ball Bursting Strength	14.2	ASTM D6797	A steel ball is forced through the fabric with a constant-rate-of-extension tensile tester to determine the fabric strength.
Tensile Strength (Avg. lbs/in.) Warp Filling	13.0 16.1	ASTM D5034	Covers the grab and modified grab test procedures for determining the breaking strength and elongation of textile fabrics. Provisions are made for wet testing.
Tearing Strength (Avg. lbs/in.) Lengthwise Yarns Widthwise Yarns	3.1 2.6	ASTM D2261	Measurement of the tearing strength of textile fabrics by the tongue (single rip) procedure using a recording constant-rate-of-extension-type (CRE) tensile testing machine.
Bacterial Filtration Efficiency* (BFE)	90%	ASTM F2101	Measurement of the filtration efficiency of the fabric using a challenge organism of <i>Staphylococcus aureus</i> .
Water Resistance (Avg.g)	16.7	AATCC Method 42	Measures the degree to which the material is a barrier to liquids
Water Vapor Transmission Rate (Avg. g/m2/24 hrs.)	965	ASTM E96	Measurement of the rate at which the fabric transfers water vapor under appropriate conditions
Air Permeability (cu. ft./min./sq.ft.)	95.3	ASTM D737	Measurement of air permeability to indicate breathability of the fabric.

#### NOTICE:

HPK Industries manufactured and distributed garments and related products are made from fabrics which may not be suitable for use in certain environments or with certain chemicals or agents. It is the user's responsibility to determine the appropriate and safe conditions for product use. HPK Industries makes NO WARRANTIES expressed or otherwise for its products or the fabrics they are made from.

## Disposable Apparel for Every Industry

### **Mission Statement**

Our mission is to create and manufacture a wide variety of technologically advanced disposable garments and accessories. Our products are designed to meet the needs of patients, and also protect workers both in a variety of markets.

Among leading companies designing and manufacturing protective garments for healthcare, pharmaceutical, scientific, clean room, and industrial safety. HPK Industries' products have established and maintained their reputation for overall quality. Indeed, our products have long been recognized for quality - that essential, expected and deserved constituent of high quality made in USA products.

### **Quality is number one**

Quality is the first factor considered by our designers in the product development process, the first tested by our staff, and the first attribute sought by the users of our products. HPK quality is the primary reason why our customers demand HPK products. Made in the USA since 1985.

### **Multiple product lines to meet your needs**

HPK manufactures a broad array of disposables. The lineup includes disposable garments and accessories, clean room garments and medical non-woven products.

### **Manufacturing is our strength**

We are one of the last remaining companies manufacturing disposable garments and accessories for a diverse customer base solely in the United States. HPK's operations are housed in a 20,000 sq. ft. facility located in Utica, NY. We carry a wide range of raw materials that can be quickly converted into finished goods enabling us to deliver exceptional turn-around time.

### **No excuses from us**

HPK has perfected a build to order manufacturing process, each order is manufactured as it arrives. Your delivery time will vary by the size of your order. HPK's products are never "on the water" or "clearing customs". If you need a custom or job specific special item we can and will manufacture it quickly, efficiently and cost effectively. It will not take weeks to deliver and there is never a minimum order. We can expedite production of your product and can overnight ship. We never charge our customers extra for these services.

### **We want to earn your business**

Serving customer needs is HPK's number one priority! We know customers expect more from us and we earn their business every day. Give us an opportunity to show you the difference from buying from a USA manufacturing company that actually manufactures in the USA.

## Media Bottle, Flask and Pipe Closures

HPK bowl covers provide a convenient means to cover bowls, flanges, flasks, beakers, containers, media bottles, and hoses. They are breathable, so when covering wet parts and equipment, moisture can still evaporate. Typically made from Tyvek<sup>®</sup>, they are puncture resistant and extremely tough. Other materials, including SMS, Alliance<sup>®</sup> and Chemflex<sup>®</sup>, are also available. Each closure incorporates latex-free rubber elastic or a draw-string to create a positive seal around all openings

- Breathable (SMS, Alliance<sup>®</sup> & Tyvek<sup>®</sup>)
- Sizes from 1/2" (1.5 cm) to 90" (229 cm) diameter
- Rubber elastic or Tyvek<sup>®</sup> drawstring provides secure seal
- Form fitting
- Lint free, antistatic (Chemflex<sup>®</sup>, Alliance<sup>®</sup> & Tyvek<sup>®</sup>)
- Will not shed or attract particles (Chemflex<sup>®</sup>, Alliance<sup>®</sup> & Tyvek<sup>®</sup>)
- Designed to be fast and easy to apply
- Antistatic (Alliance<sup>®</sup> & Tyvek<sup>®</sup>)

# HPK®

## Disposable Apparel for Every Industry

The HPK line of products developed in 1985 are widely recognized for their high-quality

### MADE IN U.S.A.

- 100% Inspected Quality • Private Labeling
- Product Customization Options • Custom Packaging Options

## Tyvek Pharma Wrap

### Tyvek® Pharma Wrap

- Made with Tyvek® fabric
- HPK wraps offer high-level protection against fluids and particles.
- Strong and resistant to tears, the fabric is still soft so it's easy to drape.
- Naturally low linting, it helps maintain the integrity of the sterile packs and the surface is friendly to sterilization tape.
- One-ply

## Material Reference

### **SMS**

3 Layer spunbonded, meltblown, spunbonded polypropylene composite disposable material. This product is the least expensive. It is not recommended for low linting or controlled environment applications. The material is splash resistant. Allows air to transfer which allows covered item to breathe.

### **Alliance<sup>®</sup>**

Extensive fabric stretch provides improved durability over non-woven fabrics used in cleanrooms. Alliance products are designed to lower particulate levels by providing extremely smooth outer fabric surface that lowers particle cling and build up in cleanroom applications. Alliance products have a unique antistatic system that assures static dissipation in sensitive cleanroom applications. Alliance products provide a liquid proof barrier that insures protection from hazardous substances used in the Biotech and Pharmaceutical cleanrooms. Research proceeds with confidence when Alliance is present.

### **Chemflex<sup>®</sup>**

Polypropylene coated on both sides with polyethylene film. This product resists certain acids and is fluid proof. HPK designed this material for use in Acid Protection Garments.

### **Tyvek<sup>®</sup>**

Most popular and widely used material for clean room and controlled environment applications.

Alliance and Chemflex trademarks of HPK Industries.

Tyvek is a registered trademark of E. I. du Pont de Nemours and Company.
